

JORGE CERMEÑO

[Miami, FL](#) | [+1 \(786\) 940 2939](#) | [contact@jcerme.com](#) | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

My name is Jorge Cermeño, a Full-Stack Developer who has a passion for development and creating value with technology. My work with Iboh Company Ltd, Swaip, and Redforts Software among many others shows my love for learning and growing. I enjoy using technology to solve problems and always look for ways to learn and improve. Actually, I am searching for a Full Stack Software Engineer position.

FRONTEND: HTML, CSS, SASS, Bootstrap, TailwindCSS, JavaScript, TypeScript, ReactJS, Astro, jQuery, Figma

BACKEND: NodeJS, Express, PHP, Python, MySQL, PostgreSQL, MongoDB

OTHER: Git & GitHub, Docker, Postman, Photoshop, Illustrator, OpenAI, Wordpress

SOFT: Leadership, Teamwork, Problem Solving, Eager to learn, Attention to Detail, Ambitious, Project Management

PROFESSIONAL EXPERIENCE

FULL STACK SOFTWARE DEVELOPER | [Redforts Software S.L.](#) *Madrid, Spain (Remote) | Mar 2023 - Present*

- Introduce an advanced filter for reservations, enhancing efficiency for over 650 hotels via a 10x faster query response (14ms).
- Optimize program performance using Python requests and streamlined database migration with SQL and Python scripts.
- Translate extensive database information into interactive and dynamic charts using ChartJs and Python.
- Rewrite the company's entire JavaScript codebase to use modern conventions.

CTO & FULL STACK SOFTWARE DEVELOPER | [Iboh Company Ltd.](#) *London, UK (Remote) | Dec 2020 - Present*

- Develop and deliver 40+ web projects, resulting in a notable increase in sales. Implemented successful marketing strategies.
- Design online stores featuring 1000+ products, implementing filtering, categories, and sliders to enhance the user experience.
- Elevate company brand image through creative content development, including sketches, logos, and photomontages.

FRONTEND DEVELOPER | [SUM](#) *Madrid, Spain (Remote) | Dec 2022 - Mar 2023*

- Enhanced website functionality through expert .htaccess file modifications.
- Streamlined business management by creating redirects for all products, categories, and tags from one WooCommerce site to another using .htaccess.

PROJECTS

SWAIP APP (STARTUP) - Full Stack Software Developer *Madrid, Spain (Remote) | Mar 2023 - Present*

- Directed end-to-end design, development, and deployment of Swaip, a SME-centric application for content and image generation on social networks.
- Secured major business meetings and clients, including prominent names like Carrefour in Spain and various agencies throughout Spain and Latin America.
- Successfully managed the entire development lifecycle, including rigorous testing, to ensure high-quality deliverables utilizing ReactJS, TailwindCSS, PHP, and MySQL as technologies to build the application.

EDUCATION
